

Can we Produce Multilingual NLP Workbenches for DH Researchers? Report on the LitText Experiment

Presentation at Brandeis University

August 4, 2023

Contents

The [slides](#) give more details about the state of the LitText Project. I have a [blog entry](#) about the project goals.

abstract: LitText is a workbench for the (literary) Digital Humanities. Building NLP workbenches for Digital Humanities researchers should be multilingual.

Design Decisions

- NLP tools are ready for users. Multilingual
- More information about NLP tools for multilingual setup is required.
